Mod 2 Week 2 Group 1 Zoom Discussion

Transcript

00:00:24 Ethan Stanks

Hey, boys.

00:00:31 Daniel Guthrie

Hello.

00:00:33 Donovan Montague

Hello.

00:00:35 Daniel Guthrie

Hey, how are y'all doing?

00:00:36 Christian Adcock

Good, good.

00:00:41 Donovan Montague

Uh-huh, uh-huh.

00:00:42 Ethan Stanks

Let's see.

00:00:51 Ethan Stanks

So let me pull everything up.

00:00:53 Ethan Stanks

It's been a Monday.

00:01:01 Ethan Stanks

All right.

00:01:06 Ethan Stanks

They went pretty fast.

00:01:07 Ethan Stanks

I don't know about anyone else, but it was like noon.

00:01:09 Ethan Stanks

I'm like, how was it noon already?

00:01:14 Ethan Stanks

Oh, I see the papers coming along.

00:01:19 Daniel Guthrie

Yeah, I feel like I've

00:01:23 Daniel Guthrie

I've done about as much as I can for the first section.

00:01:29 Daniel Guthrie

If you guys have any suggestions or want anything in there that I didn't put in there, I can obviously do that.

00:01:42 Ethan Stanks

Have you run up the turn again yet?

00:01:43 Ethan Stanks

He says because he's going to run up the turn again.

00:01:45 Daniel Guthrie

So I have not.

00:01:48 Daniel Guthrie

I can do that.

00:01:49 Daniel Guthrie

I mean, I figure I guess we can do that after.

00:01:55 Daniel Guthrie

The whole thing is is is done.

00:02:04 Daniel Guthrie

Where?

00:02:04 Daniel Guthrie

What kind of up fun, though?

00:02:06 Donovan Montague

Is it bad?

00:02:07 Donovan Montague

This is the first time I'm reading the paper.

00:02:12 Daniel Guthrie

Are you?

00:02:13 Daniel Guthrie

No, no, you're are you talking about the

00:02:16 Daniel Guthrie

Like the direction, like the rubric or the actual paper?

00:02:19 Donovan Montague

The paper.

00:02:20 Donovan Montague

I mean, when it came to the data analysis stuff, I figured there was not going to be a rubric over that.

00:02:23 Donovan Montague

So I didn't even look at that, to be honest with you.

00:02:26 Donovan Montague

would just be whatever we found and what we see, because you can't really put a rubric on trying to find bias.

00:02:31 Daniel Guthrie

Right.

00:02:32 Donovan Montague

Unless he did, and I didn't notice it.

00:02:34 Donovan Montague

That's on me.

00:02:36 Daniel Guthrie

I mean, I didn't even start really writing until like noon today, or like looking at it, because my plan was to work on it yesterday, and then I completely forgot about the Super Bowl.

00:02:45 Daniel Guthrie

And I was like, well.

00:02:46 Donovan Montague

I hosted a Super Bowl party yesterday, so I didn't do anything.

00:02:49 Daniel Guthrie

Okay, well, good.

00:02:50 Daniel Guthrie

Because I didn't do anything either.

00:02:53 Donovan Montague

Most boring Super Bowl I've ever watched, by the way.

00:02:55 Ethan Stanks

Yeah, I didn't even watch.

00:02:58 Ethan Stanks

I just watched a movie.

00:02:59 Christian Adcock

It was a dead game.

00:03:02 Donovan Montague

I literally when the Seahawks got their 4th field goal, I was like kicking.

00:03:06 Donovan Montague

I was like, they ain't no way.

00:03:06 Donovan Montague

They're going to go for a fifth one and they got a touchdown.

00:03:09 Donovan Montague

And then immediately after, I was like, man, this is some ********.

00:03:11 Donovan Montague

What the hell?

00:03:12 Daniel Guthrie

Yeah.

00:03:14 Donovan Montague

But it is what it is.

00:03:14 Donovan Montague

The Pat sold and I don't even think it was the quarterback at that point.

00:03:17 Donovan Montague

I thought Drake May was actually bad for a SEC there and then he started actually throwing the ball and just no one could catch it.

00:03:23 Donovan Montague

I mean, he did throw some plays.

00:03:25 Donovan Montague

I'm not gonna lie, but everyone does.

00:03:26 Donovan Montague

But other than that, felt like no one could catch anything you threw.

00:03:29 Daniel Guthrie

Yeah, no.

00:03:31 Daniel Guthrie

And I had a bet for Drake May over 300 passing yards and he got 295.

00:03:37 Daniel Guthrie

He was right there.

00:03:40 Donovan Montague

He probably would have gotten it too on like two or three of those plays that if they actually caught it.

00:03:45 Daniel Guthrie

Yeah, exactly.

00:03:46 Daniel Guthrie

Yeah, everybody was dropping everything.

00:03:48 Daniel Guthrie

Oh, yeah.

00:03:52 Donovan Montague

Is there any just, I guess, to just conversate on everything?

00:03:55 Donovan Montague

I know like you guys are probably reading the paper right now and I was reading it and then I stopped reading it.

00:03:59 Donovan Montague

So I'm just curious on my end, I know Ethan did a similar, we both did kind of similar data analytics stuff and I had a little bit of proxy stuff in there, but not too much.

00:04:08 Donovan Montague

I wanted to add some more, but I kind of went to that point because I also was going what Ethan did, and I figured we both had a different way of doing it.

00:04:16 Donovan Montague

Only thing I copied from Ethan is I copied what he did for the very first part, which is markdown, and then where he put the data set, and I just copied that.

00:04:24 Donovan Montague

Everything else, I kind of didn't look at anything else he did, so I have no clue.

00:04:28 Ethan Stanks

Yeah, it's both of yours.

00:04:29 Ethan Stanks

It looked like you did like a model and everything.

00:04:31 Donovan Montague

Yeah, I made sure I didn't look at yours because I feel like if I kept scrolling, I was going to start like not having original ideas and I was going to do that.

00:04:38 Ethan Stanks

Yeah, no, I think it's cool.

00:04:41 Donovan Montague

I was trying to do logistic regression stuff and like use like a confusion matrix to see maybe if that would work, you know, because we're doing, I made a feature where it was like, is it 50,000 or less?

00:04:52 Donovan Montague

Is it higher?

00:04:54 Donovan Montague

Like 01 or whatever?

00:04:56 Donovan Montague

And that turned out to be really ***.

00:04:58 Donovan Montague

It was immediately bad.

00:05:00 Donovan Montague

I made one for every single one of those three models and it took a very long time comparing every single one and like building out a for loop.

00:05:08 Donovan Montague

I was like, ChatGPT, help me out with this for loop, please.

00:05:10 Donovan Montague

Because I kept messing it up and it finally gave it to me and all the results were terrible.

00:05:16 Daniel Guthrie

Yeah.

00:05:16 Donovan Montague

You couldn't explain it because all there was is just based on how it's set up and like just based on like a lot of like

00:05:23 Donovan Montague

the groups only like two.

00:05:25 Donovan Montague

It was like it was either true positive or true negative.

00:05:27 Donovan Montague

That's all that was popped up in there.

00:05:29 Donovan Montague

No, like false positive, false negative stuff.

00:05:31 Donovan Montague

But I guess there's more to it on why that what didn't happen.

00:05:34 Donovan Montague

And I'm just not understanding why I probably need to look look into that.

00:05:39 Ethan Stanks

But I think it's just because the data was very imbalanced.

00:05:42 Donovan Montague

Yeah, I think that's what it was.

00:05:43 Donovan Montague

Yeah.

00:05:44 Donovan Montague

Because there was like.

00:05:46 Donovan Montague

That's what I was thinking is because there's like so not enough data and some of it skewed the, it's all just done a certain way where it's like, even when you got to like the white men, even it got messed up too.

00:05:57 Donovan Montague

Which was, I was like, I thought it'd be actually working there.

00:05:59 Donovan Montague

So I just did like the mean stuff and that, and it made more sense.

00:06:01 Ethan Stanks

Do you think we could put our graphs in this paper and that will help get the five pages or you think it's just has to be straight up writing for 5 pages?

00:06:12 Daniel Guthrie

I have no clue, to be honest.

00:06:13 Daniel Guthrie

I don't think it says unless I missed it.

00:06:16 Donovan Montague

Straight up writing for five pages and we get 5 pages, then add the graphs and then it's like 6 or 7 pages.

00:06:21 Donovan Montague

I know he's going to read this transcript, but it looks like we did more than what we did.

00:06:26 Donovan Montague

Five pages is the minimum.

00:06:29 Daniel Guthrie

Okay.

00:06:30 Daniel Guthrie

Yeah, I mean, I think we should work.

00:06:32 Donovan Montague

More by the way.

00:06:33 Daniel Guthrie

If you guys can, it doesn't have to be a lot, but just add a little bit more about the proxy variables that I can write some more about them too, just because.

00:06:43 Christian Adcock

That's I plan on doing it tonight.

00:06:45 Christian Adcock

the writing on the proxy variables.

00:06:48 Daniel Guthrie

Oh yeah, no, you're good.

00:06:49 Daniel Guthrie

I just mean like the like in the Jupyter notebooks.

00:06:53 Daniel Guthrie

Just because I know like for an income prediction model that would mainly be used for like credit lending and those models they're not allowed to use like

00:07:04 Daniel Guthrie

race and sex and those protected categories anyways.

00:07:07 Daniel Guthrie

So I feel like the big the big focus like real real world application would would be the the proxy variables.

00:07:13 Daniel Guthrie

You know what I mean?

00:07:13 Ethan Stanks

Do I need to touch more on occupation then?

00:07:16 Ethan Stanks

But just do like a little.

00:07:18 Daniel Guthrie

Yeah, I think I think yeah, just like doing just touching on like occupation or just picking one of those proxy variables that we can dive into.

00:07:29 Ethan Stanks

Yeah, let me open.

00:07:30 Ethan Stanks

I have a presentation.

00:07:33 Donovan Montague

Because that's a big one.

00:07:34 Ethan Stanks

Oh, can you guys all say your name out loud?

00:07:37 Ethan Stanks

Just because when I go through to do the trance, the whatever the the I don't know what it's called the what we're saying right now, I have to like manually put our names in.

00:07:51 Ethan Stanks

Last time it was like hard to tell who was who.

00:07:53 Donovan Montague

Donovan Montague.

00:07:55 Donovan Montague

Donovan Montague.

00:07:56 Donovan Montague

Donovan Montague.

00:08:01 Daniel Guthrie

Daniel Guthrie.

00:08:03 Christian Adcock

Christian Adcock.

00:08:05 Ethan Stanks

Okay, thank you.

00:08:09 Ethan Stanks

Ethan.

00:08:10 Ethan Stanks

All right, there you go.

00:08:11 Ethan Stanks

I'm the only first one to talk, so it was pretty easy last time for me.

00:08:14 Ethan Stanks

And then it was like Don, and then I had to figure out between Daniel and Christian, who was talking.

00:08:22 Christian Adcock

I think it would be really good to include graphs in the paper, because next class we're just presenting, right?

00:08:29 Ethan Stanks

We're presenting, I think.

00:08:30 Ethan Stanks

Should we do a...

00:08:31 Ethan Stanks

Like a six PowerPoint slide for that or?

00:08:34 Daniel Guthrie

I think it's no visual.

00:08:37 Christian Adcock

Right.

00:08:37 Ethan Stanks

Okay.

00:08:38 Ethan Stanks

How are we just supposed to pull the paper then?

00:08:41 Christian Adcock

So under our project document, there's the evaluation criteria.

00:08:47 Christian Adcock

Number one is individual contributions.

00:08:50 Christian Adcock

So that's like the stuff we did to make the final project.

00:08:53 Christian Adcock

Two group deliverables, quality of the final report.

00:08:58 Christian Adcock

Second thing, effectiveness of the presentation, engagement, visuals, and communication.

00:09:03 Christian Adcock

And the third thing is organization completeness of the GitHub repository.

00:09:07 Daniel Guthrie

I could have sworn in the Zoom that he said no visuals for the presentation, but I could be wrong on that.

00:09:15 Daniel Guthrie

I mean, I guess, I don't know, we can prepare a PowerPoint slide or some slides.

00:09:19 Ethan Stanks

I figured the slide would be like,

00:09:23 Ethan Stanks

first slide, group 2, I mean, group one, our names second slide, the data set third slide.

00:09:32 Ethan Stanks

the main bias.

00:09:33 Ethan Stanks

fourth slide graph, fifth slide.

00:09:38 Ethan Stanks

hidden bias or whatever.

00:09:42 Ethan Stanks

what are we saying in the paper?

00:09:44 Ethan Stanks

Proxy proxy bias or something.

00:09:46 Ethan Stanks

Last slide graph.

00:09:48 Ethan Stanks

That's what that's what I was just thinking.

00:09:50 Daniel Guthrie

Oh, yeah, that sounds good.

00:09:55 Ethan Stanks

Okay, I didn't touch on.

00:09:57 Donovan Montague

For proxy, we have a ton of options, by the way, after education.

00:10:06 Donovan Montague

Like on that occupation, marital status, relationship.

00:10:17 Donovan Montague

Work class even works too, which is interesting.

00:10:20 Donovan Montague

even though there's a ton of others in there, but still.

00:10:24 Donovan Montague

Actually, maybe not.

00:10:28 Ethan Stanks

Yeah, I had a bunch of value counts down.

00:10:30 Donovan Montague

Maybe.

00:10:30 Ethan Stanks

I don't know.

00:10:31 Donovan Montague

Are you going to do that, Ethan, or do you want me to touch on anything?

00:10:34 Donovan Montague

Because I'm going to be pretty busy trying to knock out this giant tab.

00:10:39 Donovan Montague

I don't know how to watch the video and then do what she says afterwards.

00:10:44 Donovan Montague

It takes like an hour.

00:10:46 Ethan Stanks

Well, for a class.

00:10:48 Donovan Montague

This is for business intelligence.

00:10:50 Ethan Stanks

Okay, I know what you're doing.

00:10:51 Ethan Stanks

Yeah, I just did all of her, because I'm in her like other class.

00:10:54 Ethan Stanks

I just did all of her hands-on tutorials yesterday.

00:10:57 Ethan Stanks

So.

00:10:58 Donovan Montague

I wish.

00:10:59 Ethan Stanks

I didn't want to do it today.

00:11:00 Donovan Montague

I can just copy in.

00:11:02 Donovan Montague

I did on the Excel ones, I literally would copy like the final one, because I didn't want to do the hands-on.

00:11:07 Donovan Montague

Because when I first did the first two hands-on ones, I didn't realize they wanted you to follow along.

00:11:12 Donovan Montague

And I just kind of copied what she had there and just put my notes in there as well and said, hey, this is what I didn't know it was.

00:11:19 Donovan Montague

And I didn't, I didn't, I didn't want to do it again.

00:11:20 Donovan Montague

And she gave me all the points, so.

00:11:23 Ethan Stanks

Yeah, I like her, how she does it, forces me to learn it.

00:11:28 Donovan Montague

Yeah, I don't learn that way.

00:11:29 Donovan Montague

I take, I don't like doing it while they teach.

00:11:32 Donovan Montague

I'd rather take notes and then do it myself and then learn that way.

00:11:35 Donovan Montague

I'm weird.

00:11:38 Ethan Stanks

No, I understand.

00:11:39 Ethan Stanks

It's not like the one guy.

00:11:40 Ethan Stanks

I don't know how she does it.

00:11:42 Ethan Stanks

She just feels real.

00:11:46 Ethan Stanks

All right, occupation.

00:11:47 Ethan Stanks

I'll do, okay, I'll spend like 30 minutes doing the occupation one.

00:11:51 Ethan Stanks

So then by the time you're done writing about education, you should see the occupation one.

00:11:58 Ethan Stanks

What do I need to do for occupation?

00:12:00 Ethan Stanks

What do I do for education?

00:12:02 Ethan Stanks

I might just copy what I did line for line for what I did for education and just put in occupation.

00:12:11 Donovan Montague

I'm trying to remember.

00:12:12 Donovan Montague

I'm not even looking at how I did mine because I'm not even going to look at it.

00:12:15 Donovan Montague

I don't even remember exactly.

00:12:16 Donovan Montague

I think I did dummy variables.

00:12:19 Ethan Stanks

I didn't want to touch that.

00:12:21 Donovan Montague

I think it's like the dummy variables and you're like, see, this is the data set.

00:12:24 Donovan Montague

Now we have the proxy variables.

00:12:25 Donovan Montague

Oh no, something changed.

00:12:27 Donovan Montague

That means these proxy variables show that there's bot.

00:12:30 Ethan Stanks

I just didn't feel like doing a model.

00:12:32 Ethan Stanks

I just figured I was just touching like a high-level analysis overview because

00:12:41 Ethan Stanks

I actually like dealing with the headaches of having to model.

00:12:45 Donovan Montague

Oh, you're good.

00:12:46 Donovan Montague

I had to figure out how to do a little bit of that.

00:12:48 Donovan Montague

I'm not going to lie.

00:12:49 Donovan Montague

I'll be honest.

00:12:50 Donovan Montague

I always go to Google or ChatGPT because ChatGPT is like big Google nowadays and be like, what are some good ways to do this?

00:12:56 Donovan Montague

How can you prove this?

00:12:57 Donovan Montague

What are good measures?

00:12:59 Donovan Montague

That's just kind of how I do it because it helps.

00:13:01 Donovan Montague

And then I'm like, don't give me code.

00:13:03 Donovan Montague

I'll figure it on my own.

00:13:05 Donovan Montague

And then when I get stuck, I'm like, all right, bro, here's my example.

00:13:07 Donovan Montague

What am I missing?

00:13:08 Donovan Montague

And it's like, you forgot a parentheses.

00:13:09 Donovan Montague

I'm like, oh my God, I'm stupid.

00:13:12 Donovan Montague

That's pretty much how it goes.

00:13:17 Ethan Stanks

Let's see.

00:13:17 Ethan Stanks

Yeah, I think I had notes.

00:13:18 Ethan Stanks

I googled Gemini'd.

00:13:20 Ethan Stanks

I googled Gemini'd because one education graph was like outrageously hard to make.

00:13:28 Ethan Stanks

So I think if we had to put like what we use for AI, I think I have comments.

00:13:33 Donovan Montague

Yeah, I can just, I can write a comment if need be, but I don't know if it's huge or not.

00:13:41 Ethan Stanks

Okay, so Daniel, I think you're good then.

00:13:48 Ethan Stanks

But I don't think you're good then.

00:13:50 Ethan Stanks

Christian, just got to do your part, I guess.

00:13:54 Ethan Stanks

And then I'll try to get one more thing done for you.

00:13:55 Ethan Stanks

I'm going to see if I can get it done right now.

00:13:59 Daniel Guthrie

Should we go over exactly like who's doing what in the presentation?

00:14:04 Ethan Stanks

I think he's going to.

00:14:05 Ethan Stanks

Yeah, he's choosing someone.

00:14:09 Daniel Guthrie

Oh, just one of us.

00:14:10 Ethan Stanks

Yeah.

00:14:11 Daniel Guthrie

I swear to God, if he picks me again, the last two, the last two weeks I've been walking upstairs, like delivering, and then he calls on me and I have to set all of my packages down.

00:14:21 Daniel Guthrie

And this is like last week I was like out of breath.

00:14:23 Daniel Guthrie

It's like trying to read off the like what what you guys put the discord.

00:14:28 Daniel Guthrie

And I'll be honest, I didn't even know like really what he was asking because I was just, you know, I was just trying to keep up.

00:14:35 Daniel Guthrie

But.

00:14:38 Ethan Stanks

Yeah, I try.

00:14:40 Ethan Stanks

Every time I just like cringe when he calls on you because I know you're working.

00:14:44 Daniel Guthrie

Yeah, and I feel bad because I try to I try to pay attention while I'm working, but I can only like do so much, you know?

00:14:54 Daniel Guthrie

So but I mean, it's all it's all good.

00:16:36 Donovan Montague

All right, well, yeah, it's I'm just going to repeat what you said, Ethan.

00:16:39 Donovan Montague

I think I'm good then.

00:16:40 Donovan Montague

If you guys need anything else for me, just let me know and I can help.

00:16:45 Donovan Montague

I guess you guys want to like, after we get done with everything, maybe tomorrow, message in the chat, and then we can kind of come up with a game plan for presentations.

00:16:53 Donovan Montague

And just when we have time, just add to it, like maybe like a speech or spiel, or maybe like even copy this whole life thing we have and get a summary done from like, I like using the use of AI just because it helps.

00:17:04 Donovan Montague

And this class is about ethics and AI.

00:17:07 Donovan Montague

It's just what we do.

00:17:08 Donovan Montague

Maybe you don't make a summary for us or something that we can kind of copy and like say, and then we can just take that summary and then write it in two minutes, make like a two

00:17:16 Donovan Montague

like a presentation over just getting all the key points because it's going to take a minute trying to go through this document to get the key points when we can have it summarized quick.

00:17:23 Donovan Montague

I mean, it's just easier that way.

00:17:26 Daniel Guthrie

No, I don't have any problems with that.

00:17:28 Donovan Montague

So unless it's in the rubric, we can't do this.

00:17:32 Donovan Montague

I think that would be really helpful to make it faster for us, but also make it work.

00:17:36 Christian Adcock

I think it says in the rubric.

00:17:40 Daniel Guthrie

What'd you say, Christian?

00:17:42 Christian Adcock

I don't think it says anything about that in the rubric.

00:17:44 Christian Adcock

I think we're good.

00:17:46 Daniel Guthrie

Okay, cool.

00:17:48 Daniel Guthrie

And it has to be, what, 5 minutes?

00:17:51 Christian Adcock

Yes.

00:17:52 Christian Adcock

Yeah.

00:17:53 Daniel Guthrie

Okay, that's not bad.

00:17:55 Donovan Montague

I think I just said 2 minutes, but 5 minutes is, yeah.

00:18:00 Daniel Guthrie

Okay, cool.

00:18:05 Daniel Guthrie

Alrighty, well, I'll keep looking at the Discord and

00:18:12 Daniel Guthrie

Does anybody want to be responsible for starting the PowerPoint?

00:18:15 Daniel Guthrie

I can do it.

00:18:17 Daniel Guthrie

Or if anybody else wants to do it, they can.

00:18:19 Daniel Guthrie

It doesn't matter to me.

00:18:22 Ethan Stanks

I can whip it up pretty fast.

00:18:23 Ethan Stanks

I can do it tomorrow.

00:18:25 Ethan Stanks

That's fine.

00:18:26 Donovan Montague

Does it say there should be visuals in the rubric?

00:18:29 Donovan Montague

I'm sorry.

00:18:29 Donovan Montague

I missed that part.

00:18:31 Ethan Stanks

I'm just I was just going to do like the two graphs I made.

00:18:33 Christian Adcock

And it's only mentioned once.

00:18:36 Christian Adcock

And it's like kind of offhanded a little bit.

00:18:38 Christian Adcock

So I'm not entirely sure how much he's expecting in terms of visual in the presentation, because like it says, like step 9, present your project in Zoom, select one of the group members to lead a five-minute lightning talk about the project.

00:18:56 Christian Adcock

The expectations there are summarize your findings, key biases identified, and mitigation strategies.

00:19:03 Christian Adcock

Be prepared to answer questions.

00:19:04 Christian Adcock

So in that section, there's nothing about a visual.

00:19:09 Christian Adcock

The visuals only mentioned in the group deliverables.

00:19:14 Daniel Guthrie

Okay, So that might just be in the Jupyter notebook then.

00:19:18 Christian Adcock

Yeah.

00:19:20 Daniel Guthrie

But I mean, I guess too, like just if we wanted to be safe, we could just write down the notes for the presentation in a PowerPoint slide and just throw the visuals in there or in the slides, just in case he did want a visual, then we have it.

00:19:33 Daniel Guthrie

And if not, we can just use it to present anyways.

00:19:37 Daniel Guthrie

You know what I mean?

00:19:38 Ethan Stanks

Yeah, either one.

00:19:39 Ethan Stanks

Well, he always doesn't, he always has that like thing turned off where we can't share a screen.

00:19:44 Ethan Stanks

So maybe we aren't showing anything.

00:19:46 Ethan Stanks

We're just like discussing.

00:19:49 Donovan Montague

Yeah, throwing our graphs at a PowerPoint is really easy though.

00:19:54 Donovan Montague

We're just going through photos if like take screenshots or whatever and put it in the GitHub.

00:20:00 Donovan Montague

I know you did that, but I can always add that too.

00:20:10 Christian Adcock

I'm gonna message him, see if he responds in the Discord.

00:20:14 Donovan Montague

Okay.

00:20:15 Ethan Stanks

Yeah, I wish we had like more direction.

00:20:21 Donovan Montague

I think he likes to keep it ambiguous on purpose.

00:20:37 Ethan Stanks

I think we have more articles to read this week, right?

00:20:39 Ethan Stanks

And then we have another quiz.

00:20:41 Donovan Montague

Yeah.

00:20:42 Donovan Montague

Wednesday.

00:20:43 Donovan Montague

That's the plan tomorrow for me is just read everything, do the quiz, and then not have to worry about it and look back over it on Thursday morning.

00:20:54 Ethan Stanks

Yeah, I wonder how much reading it is.

00:20:56 Ethan Stanks

I wonder how this mob test is going to be because we had that long reading one last week.

00:21:01 Donovan Montague

Yeah, I will tell you right now tomorrow for class.

00:21:06 Christian Adcock

Have you guys got the bridge back on the that last test?

00:21:12 Ethan Stanks

No.

00:21:13 Christian Adcock

Okay, Neither have I.

00:21:15 Christian Adcock

was like, when are we going to get that?

00:21:17 Ethan Stanks

Everybody just has a lot of classes.

00:21:20 Donovan Montague

I think I did it really bad on the part that was like the plagiarism and bias part.

00:21:26 Donovan Montague

I think it was like plagiarism and something else.

00:21:28 Donovan Montague

And I was like, I couldn't think of anything else.

00:21:31 Donovan Montague

I was just like, yeah, it was plagiarism and data.

00:21:33 Donovan Montague

I had to like skew it in a way where I was like, yeah, if they took my data and try to train the model off it, I'd like to have a yes or a no.

00:21:40 Donovan Montague

I had to do it that because I could not imagine anything else because it's like,

00:21:44 Donovan Montague

I would get upset, but it's like without, he said, without being ethical or everything else.

00:21:48 Donovan Montague

And it kind of took every argument I had kind of away and I had to like think of other things.

00:21:53 Daniel Guthrie

Right.

00:21:53 Daniel Guthrie

I had the same issue when I was doing it.

00:21:58 Daniel Guthrie

I was also very low on time by the end.

00:22:01 Ethan Stanks

I went to the, I had like 15 minutes left and I saw the last three to two.

00:22:06 Ethan Stanks

So I was just fat ********* everything.

00:22:10 Donovan Montague

Did everyone do the same thing as I did with the data where it's like, I don't want them to take my data?

00:22:15 Ethan Stanks

I don't even remember.

00:22:19 Ethan Stanks

I can't.

00:22:19 Ethan Stanks

There's just so many prompts.

00:22:22 Christian Adcock

Yeah, I was surprised by how many writing questions there was like in total.

00:22:27 Christian Adcock

I felt like it was there was like six of them.

00:22:30 Ethan Stanks

It was like a nine, I think.

00:22:32 Daniel Guthrie

Oh my God.

00:22:32 Ethan Stanks

I think, yes.

00:22:35 Christian Adcock

I feel like a couple of them, like you could have just combined them into a single question.

00:22:41 Christian Adcock

Like there was the one where it was like, I guess it was from the perspective of a consumer and then from the perspective of a lawyer.

00:22:47 Donovan Montague

Yeah.

00:22:47 Christian Adcock

And I'm like, well, so like one of them, you just want like a legal version of the other one.

00:22:55 Daniel Guthrie

Right.

00:22:57 Donovan Montague

I was like, legal paper, but not enough to where I could like, like I got some of the information, you know, and the quizzes and everything, and I wrote it down.

00:23:04 Donovan Montague

But after reading it, I can only remember so much.

00:23:07 Donovan Montague

I can't even remember the name of the guy.

00:23:08 Donovan Montague

So it was like, I couldn't I couldn't tell you, dude.

00:23:12 Donovan Montague

I read that and 8000 other things in my brain.

00:23:15 Donovan Montague

I was like, maybe I should have looked that over again.

00:23:18 Daniel Guthrie

Yeah.

00:23:18 Daniel Guthrie

All right.

00:23:26 Daniel Guthrie

Alrighty, well, I guess we can see if he responds, but are we good?

00:23:33 Ethan Stanks

I'll message the Discord then when I get the other analysis done, so.

00:23:43 Daniel Guthrie

Okay, I appreciate it.

00:23:46 Ethan Stanks

I'll see you boys.

00:23:48 Ethan Stanks

See you guys.

00:23:52 Donovan Montague

Well, hello there.

00:23:56 Ethan Stanks

Oh, hey, what's this in the transcript?

00:24:02 Donovan Montague

I'm still playing Fallout New Vegas.

00:24:06 Donovan Montague

I am at the part where I had just gotten done with old world blues.

00:24:11 Donovan Montague

I just finished Joshua Graham and then I got two more to do and I'm just kind of running.

00:24:15 Donovan Montague

roaming around doing every mindless quest I can think of.

00:24:18 Ethan Stanks

Oh, I just started the world boys.

00:24:20 Ethan Stanks

That's the one where you go to like the mount, mount something.

00:24:23 Donovan Montague

Big mountain.

00:24:24 Ethan Stanks

Yeah, big mountain.

00:24:24 Ethan Stanks

I just, I've never done that DLC before.

00:24:26 Ethan Stanks

So I just started that today.

00:24:29 Donovan Montague

I didn't do the Joshua Graham one ever.

00:24:30 Donovan Montague

I didn't realize that was a thing.

00:24:32 Ethan Stanks

I've not done a single DLC.

00:24:33 Ethan Stanks

Like I've only done like everything in the base game because I didn't own any DLC.

00:24:37 Ethan Stanks

So I just bought it all.

00:24:38 Donovan Montague

Yeah, that's literally the same with me as my brother had it.

00:24:41 Donovan Montague

And then I never really had any.

00:24:42 Donovan Montague

And I bought, Fallout New Vegas on the PC and I was like, dang, I have a lot of free stuff now.

00:24:47 Donovan Montague

I kind of, I'm done, I'm doing stuff.

00:24:49 Donovan Montague

And I'm like, I don't even think I'm in parts of New Vegas where I never did the full base game.

00:24:53 Donovan Montague

I just would like get like 75, 60% done.

00:24:56 Donovan Montague

And I'm on parts of the game that I didn't even know existed.

00:24:58 Ethan Stanks

Yeah, there is a lot.

00:25:00 Ethan Stanks

No, well, cause I remember I rushed to like house.

00:25:04 Ethan Stanks

I rushed like level like 4.

00:25:08 Ethan Stanks

killed Benny, took the platinum ship, gave it to the house, and then I'm like, oh, I'm just gonna go do this, the big mountain now.

00:25:14 Ethan Stanks

So now I'm like level 6, just walking around big mountain.

00:25:17 Ethan Stanks

It like warned me, oh, this is recommended for level 15 and up.

00:25:21 Ethan Stanks

Now I'm just like quick saving before every battle, and it's just like a fight for my life.

00:25:28 Donovan Montague

I'm playing ******** man.

00:25:30 Donovan Montague

I got to the point where it's like ********.

00:25:32 Donovan Montague

I'm playing on ******** and hard.

00:25:34 Donovan Montague

I can't do very hard.

00:25:34 Donovan Montague

I'll die.

00:25:35 Donovan Montague

But I got even just now where it's like I have all the ammunition and weapons.

00:25:39 Donovan Montague

Like when I went to Big Mountain, I was level 15.

00:25:42 Donovan Montague

When I left, I was level 26.

00:25:44 Ethan Stanks

I'm not even using a gun.

00:25:46 Ethan Stanks

I just I'm just doing I'm doing a melee melee weapon run.

00:25:50 Ethan Stanks

So I'm running around with a pipe.

00:25:51 Ethan Stanks

I just got some gigantic hammer.

00:25:54 Ethan Stanks

And so all

00:25:55 Ethan Stanks

I can do to these robots is this big hammer swing in the in the bat it immediately makes them go flying so then I smack them and then I wait for my bats to get back up and I smack them again so it just keeps making them fall over to where that's how I'm able to kill them it's a it's it's definitely a a gameplay let me tell you.

00:26:15 Donovan Montague

Have you seen the robo scorpions yet no you're gonna have trouble with that me melee by the way but you're also in a great place for melee items.

00:26:25 Ethan Stanks

Yeah, I just, I've seen some of the other random humanoid people.

00:26:28 Ethan Stanks

I don't forget what they're called with these like axes.

00:26:31 Donovan Montague

Lobotomites.

00:26:32 Ethan Stanks

Yeah.

00:26:34 Donovan Montague

God, I've been just literally work has been so slow and we're waiting on a business case.

00:26:38 Donovan Montague

So all I do is play New Vegas all day.

00:26:41 Ethan Stanks

Well, I was playing New Vegas.

00:26:43 Ethan Stanks

I was sorry, we were watching House MD too.

00:26:48 Ethan Stanks

I know I was debating.

00:26:49 Ethan Stanks

That's why I started rewatching it.

00:26:53 Ethan Stanks

But I have like a high priority thing, but I was waiting on a data engineer.

00:27:00 Ethan Stanks

So I was like, I'm not going to do anything.

00:27:03 Donovan Montague

I'm about to get house.

00:27:03 Donovan Montague

I'm about to start watching house now.

00:27:06 Ethan Stanks

Yeah, you need to.

00:27:06 Ethan Stanks

All.

00:27:08 Donovan Montague

Right.

00:27:08 Donovan Montague

Well, I'll see you, brother.

00:27:09 Donovan Montague

I'm going to go do the schoolwork because I'm BSing right now and I really don't want to do it, but I have to.

00:27:14 Ethan Stanks

Yeah, I don't blame you.

00:27:15 Ethan Stanks

All right, I'll see you.

00:27:16 Donovan Montague

See ya.
